SUMMARY

Resourceful web developer with solid experience in building dynamic websites. Proficient in web development, leveraging a diverse toolkit of technologies. Skilled at collaborating with teams to deliver user-focused solutions. Committed to refining skills and staying updated with industry best practices. Ready to tackle new challenges and contribute effectively to projects requiring a blend of creativity and technical expertise.

SKILLS

Languages: HTML, CSS, JavaScript, Java

Technologies: ReactJS, MongoDB, NodeJS, ExpressJS, Tailwind CSS, Bootstrap, GSAP, SQL

PROJECTS

Wanderlust

[Github](#)

[Project Link](#)

- Designed and implemented a user authentication system with login and logout features to ensure secure access.
- Created functionality for users to add and showcase hotel listings, enhancing the platform's content and usability.
- Integrated a review system, allowing users to provide feedback and rate hotels, fostering a community-driven environment.
- Utilized the Mapbox API for interactive map integration, enabling users to visualize hotel locations and explore nearby areas.

Technologies used: MongoDB, NodeJS, ExpressJS, Bootstrap, Mapbox

Crypto Watchdog

[Github](#)

[Project Link](#)

- Implemented real-time price updates for cryptocurrencies, ensuring users receive the most current market data.
- Supported multiple currencies (USD, EUR, INR) to provide comprehensive financial information tailored to user preferences.
- Integrated interactive graphical representations of price trends, enabling users to visualize market movements over time.
- Ensured a responsive and user-friendly interface, enhancing the overall user experience.

Technologies used: ReactJS, CoinGecko API

Gemini Chatbot Clone

[Github](#)

[Project Link](#)

- Built a responsive and interactive user interface with React.js to replicate the functionalities of the original Gemini chatbot.
- Integrated the Gemini API to enable real-time conversational capabilities, providing accurate and context-aware responses.
- Implemented efficient state management in React to handle dynamic data and maintain smooth chatbot interactions.

Technologies used: ReactJS, Gemini API

EDUCATION

9/2021 - Present **Bachelor of Technology,
Computer Science and Engineering**
CGPA: 7.97

RCC Institute of Information Technology
